

# MOHAMED ABDELRAHMAN

## FRONTEND DEVELOPER

Location: Masr Elgedida, Cairo, Egypt | [+20 155 501 8863](tel:+201555018863) | [mohammed.abdelrahman.dev@gmail.com](mailto:mohammed.abdelrahman.dev@gmail.com)

Portfolio: <https://mohamed-allam.onrender.com/>

LinkedIn: <https://www.linkedin.com/in/muhammed-abdelrahman/>

GitHub: <https://github.com/Mohamed3allam/>

## Professional Summary

---

Frontend Developer specialized in React.js and Next.js, building high-performance, scalable, and accessible interfaces. Skilled at turning UI/UX designs into clean, reusable components and optimizing apps through SSR/SSG, code-splitting, and responsive design. With solid foundations in Node.js, Express, and MongoDB, I bring a full-stack mindset to frontend work, ensuring seamless integration with backend services and production-ready deployments.

## Experience

## Education

---

Ain Shams University | Faculty of Business Credit Hours System

( Jun 2022 )

B.Sc. Financial Markets & Institutions | GPA: 3.46

Career shift into software development through self-study and hands-on projects.

## Technical Skills

## Projects

---

- **Apartment Listing Platform** — *Next.js (TypeScript), Express (Typescript)* (Aug 2025) [\[Live Demo\]](#) | [\[Github\]](#)
  - A **Responsive Apartment Marketplace** with **search, filtering, and form handling** for adding new listings.
  - Implemented **modular, type-safe components** using React Hook Form and Bootstrap for clean UI and usability.
  - Integrated with a custom **Express + TypeScript API** (AWS EC2) to fetch and persist listings.
  - Frontend deployed on **Vercel**, backend deployed on AWS EC2.
  - Full app containerized with **Docker** for portability.
- **Information Fortress Cybersecurity** — *Next.js, Redux Saga.* (Dec 2024) [\[Production Link\]](#)
  - A bilingual informative website optimized for performance and SEO, delivered under Nourseen.
  - Implemented responsive design and localization to deliver a seamless user experience across languages and devices.
  - Delivered as part of my role at Tjaara.
- **Athman Al Emtiyaz** — *Next.js, Redux Saga.* (Oct 2024) [\[Production Link\]](#)

- A bilingual informative website optimized for performance and SEO, delivered under Nourseen.
  - Implemented responsive design and localization to deliver a seamless user experience across languages and devices.
  - Delivered as part of my role at Tjaara.
- 3D T-Shirt Configurator** — *React, Three.js, React Three Fiber. (Aug 2024)*     [\[Live Demo\]](#) | [\[Github\]](#)
  - 3D T-Shirt customization tool allowing users to design and preview t-shirts with personalized text, logos, and colors.
  - Implemented real-time rendering using Three.js + React Three Fiber for a smooth user experience.
- Personal Portfolio Website** — *React, Three.js, React Three Fiber. (Jun 2024)*     [\[Live Demo\]](#) | [\[Github\]](#)
  - Built a fully responsive portfolio showcasing my skills, projects, and experience as a web developer.
  - Optimized for performance, SEO, and user experience across desktop and mobile devices.
- Menus App** — *React Typescript, Node.js (Express), MongoDB .(Jul 2024)*     [\[Live Demo\]](#) [\[Dashboard\]](#) [\[Github\]](#)
  - Built a full-stack restaurant menu management app with client side and dashboard where admins can create, update, and organize categories & items.
  - Implemented a clean, responsive UI with search & filters for easy menu navigation.
  - Integrated role-based authentication and MongoDB for secure, scalable data storage.
  - Designed API endpoints with Express.js to handle menu CRUD operations efficiently.
- WOMS Website** — *React.js, Bootstrap. (Dec 2023)*     [\[Live Demo\]](#) | [\[Github\]](#)
  - A web-based solution for managing workflow and orders for a medical business.
  - Built using React.js with a focus on user experience and responsiveness.
- Al Phoronya Website** — *React.js, Bootstrap. (Sep 2023)*     [\[Live Site\]](#) | [\[Github\]](#)
  - A real estate platform showcasing properties with an intuitive and modern interface.
  - Built with React.js and optimized for performance across web and mobile devices.
- Premium Club ASU Website** — *React.js. (Jan 2022)*     [\[Live Site\]](#) | [\[Github\]](#)
  - Developed a fully responsive website for a student organization at Ain Shams University.
  - Implemented multi-page navigation, event pages, and user-friendly UI/UX for students and visitors.
- Basmah ASU Website** — *React.js. (Sep 2020)*     [\[Live Site\]](#) | [\[Github\]](#)
  - One-page React site using Styled Components for Basmah Foundation's mission and activities.

## Certificates

---

- **MongoDB Node.js Developer Path.**     [\[ Credential \]](#)
- **Front-end UDACITY participation Certificate.**     [\[ Credential \]](#)
- **Full stack UDACITY participation Certificate.**     [\[ Credential \]](#)
